GENERAL INDEX

A

Abscission, leaf, effect of radiation and growth regulators on, 471

Absorptiometry of paper chromatograms, quantitative determination of buckwheat flavonoid substances by, 71

Absorption and translocation of sulfur in Red Kidney bean, 28

Absorption of cobalt-60 by leaves of bean plants in the dark, 316

Absorption of ionic species of orthophosphate by barley roots: Effects of 2,4-dinitrophenol and oxygen tension, 155

Absorption of rubidium by excised mung bean roots, effect of sulfhydryl inhibitors on, 403

Absorption of zinc in citrus plants, factors affecting, 294

Acer saccharum Marsh.—A statistical evaluation of some of the factors responsible for the flow of sap from the sugar maple, 57

Acetate, radioactive, IAA and the utilization of, by wheat roots, 451

Acids, alpha-keto, cofactor requirements for oxidation by sweet potato mitochondria, 425

Acid synthesis in tomato fruits, 192

Activity of particulate cytochrome oxidase, influence of salts on, 357

Adenylic kinase in higher plants, 37

Adsorption of zinc sulfate in Thompson seedless grape canes, some studies of, 393

Agrobacterium tumefaciens—Necessity of indoleacetic acid for the duplication of crown-gall tumor cells, 17

AIRTH, ROBERT L. See FRENCH, C. S., 369

AKERS, THOMAS J. Studies in plant metabolism. VI. Effect of 2,4-D on the metabolism of aspartic acid and glutamic acid in the bean plant, 34

Alfalfa lipoxidase, 320

Alga, *Ochromonas malhamensis*, the metabolism of glucose by, 299

Alkaloids, tobacco, studies on. I. Changes in nicotine and nornicotine content in Nicotiana, 433

Alpha-keto acids, cofactor requirements for oxidation by sweet potato mitochondria, 425

Amaranthus caudatus L.—Photoreversibility of flower initiation, 279

American Society of Plant Physiologists, annual meeting, reports and business, 82

American Society of Plant Physiologists, appointments, 170

American Society of Plant Physiologists, formation of sections, 258

American Society of Plant Physiologists, mid-western section, news, 84

American Society of Plant Physiologists, sections' officers, 487

Amino acid incorporation into the proteins of cell-free preparations, significance of the measurements of, 482

ANDERSON, IRVIN Effect of manganese and certain other metal cations on isocitric dehydrogenase and malic enzyme activities in *Phaseolus vulgaris*, 22

ANDREAE, W. A. See GOOD, NORMAN E., 231

ANDREAE, W. A. Studies on 3-indoleacetic acid metabolism. III. The uptake of 3-indoleacetic acid by pea epicotyls and its conversion to 3-indoleacetylaspartic acid, 235

Anesthetization by di-ethyl ether and the transport of foliar applied radiocalcium, 254

APPLEWHITE, THOMAS H. See ORDIN, LAWRENCE, 44

Arachis hypogea L., var. Virginia Jumbo—adenylic kinase in, 37

ARONOFF, S. Experiments on the biogenesis of the pyridine ring in higher plants, 355

ARONOFF, S. See GAGE, R. S., 477

ASHTON, FLOYD M. Effects of a series of cycles of alternating low and high soil water contents on the rate of apparent photosynthesis in sugar cane, 266

Aspartic acid metabolism in the bean plant, effect of 2,4-D on, 34

Asymmetric distribution of C^{14} in the glucose phosphates formed during photosynthesis, 411

Atmospheric fluoride: Its uptake and distribution in tomato and corn plants, 329

Auxin activity and kinetin, 253

Auxin inactivation system involving tyrosinase, 165

Auxin-induced water uptake by Avena coleoptile sections, 44

Auxin, residual effect of the cell wall, 350

Auxins, a new, sensitive, straight-growth test for, 94

Auxins, studies by paper chromatography, 162

Avena coleoptile sections, auxin-induced water uptake by, 44

Avena coleoptile sections, permeability to water measured by diffusion of deuterium hydroxide, 53

Avocado—The reduction and oxidation of glutathione by plant mitochondria, 205

B

BAILEY, LOWELL F. See JONES, M. BAXTER, 347

BAKER, JAMES E. Effects of boron on the water relations of higher plants, 89

BALL, CHARLES D. See BYERRUM, RICHARD U., 374

BARBER, GEORGE A. See STUMPF, P. K., 304

Barley—Photoreversibility of flower initiation, 279

Barley roots, kinetics of sulfate absorption by, 222

Barley roots, salt respiration and phosphate contents of, 62

Bean, ribonucleic acid in, 1

Bean leaves, absorption of cobalt-60 in the dark by, 316

Bean plant, effect of 2,4-D on the metabolism of aspartic acid and glutamic acid in, 34

Bean roots, excised, effect of the bicarbonate ion on the respiration of, 151

Bean seedlings, effect of radiation and growth regulators on leaf abscission in, 471

Bean seedlings, fate of 2,4-D in. I. Recovery of 2,4-D and its breakdown in the plant, 382

Bean seedlings, fate of 2,4-D in. II. Translocation, 446

Bean seedlings—Response of the hypocotyl hook to radiant energy and other factors, 289

BEEVERS, HARRY Intermediates of the pentose phosphate pathway as respiratory substrates, 339

BEEVERS, HARRY Utilization of glycerol in the tissues of the castor bean seedling, 440
BENSON, A. A. See MAIZEL, J. V., 407
Benzylaminopurine, promotion of leaf expansion by, 321
Betaine, utilization of, as a methyl group donor in tobacco, 374
Beta vulgaris—Chlorine, bromine and sodium as nutrients for sugar beet plants, 171
BIALE, J. B. See LIEBERMAN, M., 420, 425
BIDDULPH, O. The absorption and translocation of sulfur in Red Kidney bean, 28
BIDDULPH, S. See BIDDULPH, O., 28
Bicarbonate ion, effect on respiration of excised roots, 151
Biogenesis of the pyridine ring, experiments in higher plants, 355
Biosynthesis of indoleacetic acid in the styles and ovaries of tobacco preliminary to the setting of fruit, 334
BOCCHI, ADA Photoperiodic induction of disbudded Perilla plants, 480
BONNER, JAMES See CLELAND, ROBERT, 350
BONNER, JAMES See ORDIN, LAWRENCE, 44, 53
BONNER, JAMES See SALISBURY, FRANK B., 141
Book review. Outlines of Enzyme Chemistry, J. B. Neilands and Paul K. Stumpf, 84
Book review. Photoplasmatologia, Volume 2E, L. V. Heilbrunn and F. Weber, parts 4 and 5, 170
Book review. Vegetation and Watershed Management, E. A. Colman, 85
Boron, effect on the water relations of higher plants, 89
Boron, role in the translocation of organic compounds in plants, 11
Brassica Kaber Wheel. var. *pinnatifida* Stokes, effects of petroleum oils on respiration of, 5
Breakdown of 2,4-D in bean seedlings, 382
BRENNAN, E. See LEONE, IDA A., 329
BRIGGS, WINSLOW R. An auxin inactivation system involving tyrosinase, 165
Bromine as nutrient for sugar beet plants, 171
BROWN, ALLAN H. See RAHMAN, OBAIDUR, 408
Bryophyllum calycinum, capacity of leaves to recover from prolonged exposure to darkness or to light, 455
Buckwheat flavonoid substances, quantitative determination of, 71
Buckwheat flavonoid substances during seedling development, quantitative changes in, 75
BUHLER, D. R. The conversion of $C^{14}O_2$ and CH_3-$C^{14}O$-COOH to citric and malic acids in the tomato fruits, 192
BUKOVAC, M. J. Anesthetization by di-ethyl ether and the transport of foliar applied radiocalcium, 254
BYERRUM, RICHARD U. Utilization of betaine as a methyl group donor in tobacco, 374

C

Canes, Thompson seedless grape, some studies of adsorption of zinc sulfate in, 393
Capacity of leaves of *Bryophyllum calycinum* to recover from prolonged exposure to darkness or to light, 455
Carbohydrates in clover, overwintering trends of cold resistance and, 364
Carbon-14 in glucose phosphates formed during photosynthesis, asymmetric distribution of, 411
Carbon dioxide fixation, influence of light and darkness upon, 323
Carbon dioxide fixation in the dark by succulent leaves: First products, 464
Carbon dioxide output in respiration of parsnip and mustard, effects of petroleum oil on, 5
Castor bean seedling, utilization of glycerol in the tissues of, 440
Cell wall, residual effect of auxin on, 350
Cestrum nocturnum, floral initiation in, 185
Cestrum nocturnum, floral initiation in. II. A 24-hour versus a 16-hour photoperiod for long-day induction, 429
Cestrum nocturnum, floral initiation in. III. The effect of temperature upon long-day and short-day induction, 430
Changes in nicotine and nornicotine contents in Nicotiana, 433
Chilling temperatures, physiological injury at, 308
Chlorella culture under conditions of micronutrient element deficiency, 181
Chlorine, bromine and sodium as nutrients for sugar beet plants, 171
Chlorophyllase in soybean, 477
Chlorophyll contents in chlorotic sunflower leaves, relation between iron and, 199
Chlorophylls, fluorescence-spectrum curves of, 369
Chloroplasts, adenylic kinase in, 37
Chlorosis of pineapple in relation to iron and nitrogen, 211
CHRISTENSEN, B. E. See BUHLER, D. R., 192
Chromatography, paper, studies of plant indoles and auxins by, 162
Citrus plants, factors affecting absorption and translocation of zinc in, 294
CLELAND, ROBERT The residual effect of auxin on the cell wall, 350
Clover, overwintering trends of cold resistance and carbohydrates in, 364
Cobalt-60, absorption by leaves of bean plants in the dark, 316
Cofactor requirements for oxidation of alpha-keto acids by sweet potato mitochondria, 425
Cold resistance in clover, overwintering trends of, 364
Coleoptile, studies on the growth of. A new, sensitive, straight-growth test for auxins, 94
CONN, ERIC E. See YOUNG, L. C. T., 205
Control of plastid pigment formation by a virescent gene, pale-yellow-1, of maize, 415
Conversion of $C^{14}O_2$ and CH_3-$C^{14}O$-COOH to citric and malic acids in the tomato fruits, 192
Conversion of 3-indoleacetic acid to 3-indoleacetylaspartic acid, 235
Corn plants, uptake and distribution of atmospheric fluoride in, 329
CORY, R. See BIDDULPH, O., 28

Cotton leaf-discs, influence of temperature on the respiration of, 275
Cotton seedlings, effect of radiation and growth regulators on leaf abscission in, 471
Cowpea, ribonucleic acid in, 1
Crepis capillaris—Induction of flowering in long-day plants by applied indoleacetic acid, 147
Crown-gall tumor cells, necessity of indoleacetic acid for the duplication of, 17
CRUZADO, H. J. See MUZIK, T. J., 81
Cucumber, ribonucleic acid in, 1
Cucumber fruits, respiration of, 308
Cucumis sativus L.—Respiration of cucumber fruits associated with physiological injury at chilling temperatures, 308
Cucumis sativus L. var. Chicago Pickling, ribonucleic acid in, 1
Curves, fluorescence-spectrum, of chlorophylls, pheophytins, phycoerythrins, phycocyanins and hypericin, 369
Cytochrome oxidase, particulate, influence of salts on the activity of, 357

D

DAINES, R. H. See LEONE, IDA A., 329
Dark fixation of CO_2 by succulent leaves: The first products, 464
Dark period reactions, 141
Darkness, influence on CO_2 fixation, 323
DAVIS, GRAHAM J. See GREULACH, VICTOR A., 478
Dehydrogenase activity of hydroxymalonate and related acids in higher plants, 135
Deuterium hydroxide diffusion, permeability of Avena coleoptile sections to water measured by, 53
Deuterium hydroxide, diffusion of, as a measure of the permeability of *Vicia Faba* root segments to water, 468
Dichlorophenoxyacetic acid, effect on the formation of a red pigment in Jerusalem artichoke tuber tissue, 315
Dichlorophenoxyacetic acid, effect on the metabolism of aspartic acid and glutamic acid in the bean plant, 34
Dichlorophenoxyacetic acid, effect on transport of IAA, 118
Dichlorophenoxyacetic acid, fate in bean seedlings. I. Recovery of 2,4-D and its breakdown in the plant, 382
Dichlorophenoxyacetic acid, fate in bean seedlings. II. Translocation, 446
Dichlorophenoxyacetic acid translocation in tomato plants, relation of phosphorus nutrition to, 196
Di-ethyl ether anesthetization and the transport of foliar applied radiocalcium, 254
Diffusion of deuterium hydroxide, as a measure of the permeability of *Vicia Faba* root segments to water, 468
Diffusion of deuterium hydroxide, permeability of Avena coleoptile sections to water measured by, 53
Dinitrophenol, effects on the absorption of ionic species of orthophosphate by barley roots, 155
DISTLER, J. R. See SUSSMAN, A. S., 126
Distribution, asymmetric, of C^{14} in the glucose phosphates formed during photosynthesis, 411
DOWNS, R. J. Photoreversibility of flower initiation, 279
DUGGER, W. M., JR. See BAKER, JAMES E., 89
DUGGER, W. M., JR. See SISLER, EDWARD C., 11

E

EAKS, IRVING L. Respiration of cucumber fruits associated with physiological injury at chilling temperatures, 308
Effect of bicarbonate ion on the respiration of excised roots, 151
Effect of 2,4-D and other growth-regulators on the formation of a red pigment in Jerusalem artichoke tuber tissue, 315
Effect of 2,4-D and 2,3,5-triiodobenzoic acid on the transport of indoleacetic acid, 118
Effect of 2,4-D on the metabolism of aspartic acid and glutamic acid in the bean plant, 34
Effect of maleic hydrazide on pineapple, 81
Effect of manganese and certain other metal cations on isocitric dehydrogenase and malic enzyme activities in *Phaseolus vulgaris*, 22
Effect of micronutrient deficiencies on nicotine formation by tobacco in water-culture, 377
Effect of radiation and growth regulators on leaf abscission in seedling cotton and bean, 471
Effect of ribonuclease on salt absorption by excised mung bean roots, 251
Effect of spray residues and other contaminants on leaf analysis, 256
Effect of sulfhydryl inhibitors on rubidium absorption by excised mung bean roots, 403
Effect of temperature upon long-day and short-day induction in *Cestrum nocturnum*, 430
Effects of boron on the water relations of higher plants, 89
Effects of 2,4-dinitrophenol and oxygen tension on the absorption of ionic species of orthophosphate by barley roots, 155
Effects of light on the rate of respiration in the stem of *Pisum sativum* L., 167
Effects of petroleum oils on the carbon dioxide output in respiration of parsnip and mustard, 5
Effects of a series of cycles of alternating low and high soil water contents on the rate of apparent photosynthesis in sugar cane, 266
Electrophoretic patterns and mobilities of nucleoproteins and nucleic acids, 1
ELSTAD, V. B. See KLEIN, WM. H., 289
Enzyme activity in *Phaseolus vulgaris*, effect of manganese and metals cations on, 22
EPSTEIN, EMANUEL See LEGGETT, JAMES E., 222
ERICKSON, RALPH O. See MARVIN, JAMES W., 57
EVANS, HAROLD J. See ANDERSON, IRVIN, 22
EVANS, HAROLD J. See MILLER, GENE W., 357
Exogenous substrate utilization and fermentation by the pollen of *Pinus ponderosa*, 284
Experiments on the biogenesis of the pyridine ring in higher plants, 355

F

Factors responsible for the flow of sap from the sugar maple, a statistical evaluation of, 57

Fagopyrum esculentum Moench, var. Japanese—Quantitative changes in buckwheat flavonoid substances during seedling development, 75

FANG, S. C. See AKERS, THOMAS J., 34

Fate of 2,4-D in bean seedlings. I. Recovery of 2,4-D and its breakdown in the plant, 382
